Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-4 are objected to because of the following informalities:

Claim 1 comprises more than one sentence. Each claim may only comprise one sentence.

Claim 4, line 1-2, delete "the means of detaching" and insert --a means of detaching--.

Claims 2-4 are also objected to for being dependent on an objected base claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by McClure et al. (6,805,364).

2. As to claims 1-4, McClure discloses a device that can be connected to a snow board, the device comprising a connecting component (50), connecting means (screws in Fig. 3), a horizontal and vertical rotational means/component (26), and a handle component (20) with detachment means (22) wherein the handle can rotate vertically and horizontally (see Figs. 1-3). The language of claim 1 pertaining to the method of use of the device has been ignored since that language merely speaks to the intended use. The language of claim 2 regarding the preference for the use of existing

snowboard binding screw holes has been ignored because that clause was merely a preference and the snowboard is not part of the invention. That is, a snowboard has not been positively recited as being part of the invention.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Graham '657 discloses a snow board having an adjustable training attachment.

Farrally-Plourde ' 414 disclose a ski device having a steerable handle.

Favorito et al. '516 disclose an exercise device having an adjustable steering handle.
